

Job Title : Golang +Terraform Provider
Location : Pune, Bangalore, Kolkata, & Indore
Type of Demand : Full Time Employee-Work from Office
Experience : 6+ Years

Job Summary:

We're looking for a highly skilled Golang developer with expertise in writing and publishing Terraform providers. The ideal candidate will have hands-on experience with Terraform Test Framework and a strong portfolio of published providers, particularly for cloud platforms like AWS and Splunk.

Key Responsibilities:

- Design, develop, and maintain Terraform providers for various cloud and infrastructure platforms
- Write high-quality, well-tested code using Golang and Terraform's SDK
- Collaborate with cross-functional teams to identify and prioritize provider features and fixes
- Utilize Terraform Test Framework to ensure thorough testing and validation of providers
- Publish and maintain providers in the Terraform Registry
- Troubleshoot and resolve issues reported by users and internal teams

Requirements:

- Strong proficiency in Golang, with experience writing production-grade code
- Proven experience writing and publishing Terraform providers, with a strong focus on cloud platforms (e.g., AWS, Splunk)
- In-depth knowledge of Terraform Test Framework and its application in provider development
- Excellent problem-solving skills, with the ability to debug complex issues
- Strong communication and collaboration skills, with experience working with distributed teams
