SAVINGS

π FinOps

DRIVING CLOUD EFFICIENCY WITH FINANCIAL INTELLIGENCE

Cloud delivers unmatched power and agility - but without the right controls, costs can quickly spiral.

Pi FinOps helps enterprises take charge of their cloud spend, driving financial accountability, cost efficiency and measurable business value across the entire cloud journey.

Industry Challenges

FinOps Service Value Across Industries

Pharma & Healthcare - Control compliance-driven data storage and processing costs while ensuring audit readiness.

Banking & Financial Services (BFSI) - Close governance gaps and manage unpredictable scaling with financial transparency.

Retail & E-commerce - Optimize seasonal demand spikes to prevent overspending and improve margins.

Insurance - Streamline claims processing and balance uneven compute usage for cost efficiency.

Energy & Utilities Optimize fluctuating IoT and sensor workloads for predictable, sustainable cost management.

These challenges demand a **FinOps-first approach** to balance innovation with governance.

π-FinOps?

Pi FinOps is the cloud financial management solution that unites technology, finance, and business strategy into a single discipline. It empowers enterprises to maximize cloud ROI, improve cost transparency and reinvest savings into innovation ensuring they stay agile, efficient, and competitive in a rapidly evolving market:

Key Capabilities:

- Align cloud investments with business priorities to maximize strategic impact
- Gain real-time visibility and reporting for proactive cost management
- Foster seamless IT-Finance collaboration to drive accountability and shared outcomes
- Optimize cloud usage and efficiency without compromising performance or innovation

Key Benefits

- ✓ Unlock 20-30% cost savings through continuous cloud optimization
- ✓ Leverage real-time, data-driven insights to make smarter decisions faster
- ✓ Improve forecasting accuracy for agile and predictable financial planning
- ✓ Drive transparency and accountability across technology, finance and business teams
- ✓ Enable scalable cloud economics that fuel sustainable enterprise growth

The π-FinOps Framework

Analyze
Achieve full visibility into cloud usage, costs, and performance KPIs.

$\rightarrow$

Optimize
Automate guardrails, rightsize resources, and eliminate waste to maximize efficiency.

$\rightarrow$

Execute
Reinforce accountability across teams while unlocking agility, innovation, and sustainable growth.

Why πbyThree?

Deep industry expertise across Retail, Pharma, BFSI, Insurance, and Energy

Retail **Insurance** **BFSI**
